LatticeMico System Software Release Notes for Lattice Diamond

Changes to LatticeMico System Software

Starting with Diamond v3.9, the LatticeMico software has the following changes:

Changes to Installation Executable

A new version system will be implemented starting in Diamond v3.9. An executable with the format LMS_1.x will be released for each version of Diamond. Refer to the *Lattice Diamond Installation Notice for Windows* and the *Lattice Diamond Installation Notice for Linux*.

Windows

For Windows, the format will be as shown in the following examples:

▶ LMS_1.0_for_Diamond3.9.exe when Diamond 3.9 is released

▶ LMS_1.0_for_Diamond3.10.exe when Diamond 3.10 is released

Linux

For Linux, the format will be as shown in the following examples:

▶ lms_v1_0_for_diamond3_9 Diamond 3.9 is released

▶ lms_v1_0_for_diamond3_10 when Diamond 3.10 is released

Start Menu Name Changes

The name of LatticeMico will change in the Start menu. The new format will be "LMS 1.0 for Diamond *<version_number>*." The new format, compared to the old format, is shown below.

LatticeMico name format in Diamond v3.8 and earlier

LatticeMico name format in Diamond v3.9 onward.

Impact on LatticeMico Documentation

Various LatticeMico documents, such as the LatticeMico System Builder online help, the Lattice Software Project Environment online help, the LatticeMico User Guides, the LatticeMico Reference Manuals, and the LatticeMico Tutorials, may still refer to the old naming style. Simply substitute the new name when using these documents. Everything else about the software is unchanged.
