

PCIe x1 IP

IP Version: v3.0.1

Release Notes

FPGA-RN-02060-1.5

April 2026

Disclaimers

Lattice makes no warranty, representation, or guarantee regarding the accuracy of information contained in this document or the suitability of its products for any particular purpose. All information herein is provided AS IS, with all faults, and all associated risk is the responsibility entirely of the Buyer. The information provided herein is for informational purposes only and may contain technical inaccuracies or omissions, and may be otherwise rendered inaccurate for many reasons, and Lattice assumes no obligation to update or otherwise correct or revise this information. Products sold by Lattice have been subject to limited testing and it is the Buyer's responsibility to independently determine the suitability of any products and to test and verify the same. LATTICE PRODUCTS AND SERVICES ARE NOT DESIGNED, MANUFACTURED, OR TESTED FOR USE IN LIFE OR SAFETY CRITICAL SYSTEMS, HAZARDOUS ENVIRONMENTS, OR ANY OTHER ENVIRONMENTS REQUIRING FAIL-SAFE PERFORMANCE, INCLUDING ANY APPLICATION IN WHICH THE FAILURE OF THE PRODUCT OR SERVICE COULD LEAD TO DEATH, PERSONAL INJURY, SEVERE PROPERTY DAMAGE OR ENVIRONMENTAL HARM (COLLECTIVELY, "HIGH-RISK USES"). FURTHER, BUYER MUST TAKE PRUDENT STEPS TO PROTECT AGAINST PRODUCT AND SERVICE FAILURES, INCLUDING PROVIDING APPROPRIATE REDUNDANCIES, FAIL-SAFE FEATURES, AND/OR SHUT-DOWN MECHANISMS. LATTICE EXPRESSLY DISCLAIMS ANY EXPRESS OR IMPLIED WARRANTY OF FITNESS OF THE PRODUCTS OR SERVICES FOR HIGH-RISK USES. The information provided in this document is proprietary to Lattice Semiconductor, and Lattice reserves the right to make any changes to the information in this document or to any products at any time without notice.

Inclusive Language

This document was created consistent with Lattice Semiconductor's inclusive language policy. In some cases, the language in underlying tools and other items may not yet have been updated. Please refer to Lattice's inclusive language [FAQ 6878](#) for a cross reference of terms. Note in some cases such as register names and state names it has been necessary to continue to utilize older terminology for compatibility.

1. Introduction

This document contains the Release Notes for the PCIe x1 IP. For specific details about the IP, refer to the following:

- [PCIe x1 IP Core User Guide \(FPGA-IPUG-02091\)](#)
- [Lattice Avant and Nexus PCIe Host DMA Driver Software User Guide \(FPGA-TN-02386\)](#)
- [Lattice Avant and Nexus PCIe Basic Memory-Mapped Host Driver \(Non-DMA\) User Guide \(FPGA-TN-02387\)](#)
- [PCI Express for Nexus FPGAs](#) web page

PCIe x1 IP v3.0.1

Software	Software Version	Summary of Changes
Lattice Radiant™	2025.2.1	<ul style="list-style-type: none"> • Fixed issues observed in the Propel software. • Added MachXO5™-NX (LFMXO5-30TDQ) device support.

Corrections to Previous Release Notes

In v3.0.0, an open-source Linux driver is added for the non-DMA configuration.

PCIe x1 IP v3.0.0

Software	Software Version	Summary of Changes
Lattice Radiant	2025.2	<ul style="list-style-type: none"> • IP Update <ul style="list-style-type: none"> • Made enhancements to the IP user interface. • Feature Updates <ul style="list-style-type: none"> • Enabled DMA. • Enabled MSI-X feature in AXI Bridge mode. • Example Design Update <ul style="list-style-type: none"> • Added DMA Example Design simulation and hardware support. • Enabled QuestaSim Lattice-Edition simulation. • Driver updates <ul style="list-style-type: none"> • Added driver support for DMA.

PCIe x1 IP v2.1.0

Software	Software Version	Summary of Changes
Lattice Radiant	2025.1.1	<ul style="list-style-type: none"> • Driver updates <ul style="list-style-type: none"> • Added driver support for non-DMA TLP mode.

PCIe x1 IP v2.0.1

Software	Software Version	Summary of Changes
Lattice Radiant	2025.1	<ul style="list-style-type: none"> • Updated the PCIe IP License string. • Enabled the clock user out signal.

PCIe x1 IP v2.0.0

Software	Software Version	Summary of Changes
Lattice Radiant	2025.1	<ul style="list-style-type: none"> Added new device support for Certus-NX (LFD2NX-35 and LFD2NX-65). Added new device support for MachXO5-NX (LFMXO5-35T and LFMXO5-65T). The Hardware and Simulation capable Example Design is enabled for both AXI-S and TLP data interfaces. Feature Updates: <ul style="list-style-type: none"> AXI Bridge Mode enablement. Removed AHB-L related features. This feature is still available in older IP versions (v1.2.5 or older) The IP's user interface configuration is revamped and port names are aligned to be similar to the PCIe IPs used in other Lattice FPGA device families.

PCIe x1 IP v1.2.5

Software	Software Version	Summary of Changes
Lattice Radiant	2024.2	<ul style="list-style-type: none"> Added new device support for Certus-NX (LFD2NX-28). Fixed CrossLink-NX constraint file.

PCIe x1 IP Earlier Versions

IP Version	Summary of Changes
1.2.4	Reduced simtime for Modelsim OEM simulator.
1.2.2	Added ED Testbench.
1.2.1	Added Address Space mapping for Propel.
1.2.0	Added Propel support.
1.1.3	Updated for Linux support.
1.1.2	<ul style="list-style-type: none"> Updated IP user interface. Fixed several issues on DMA. Added DMA data checking on TB.
1.1.1	Fixed issue on path with space character in component generator script.
1.1.0	Added LFD2NX-40.
1.0.2	Corrected aux_clk_i connection on default interface.
1.0.1	Initial release.
1.0.0	Preliminary release.
